

Cookies are tiny text files stored on your computer when you visit certain web pages.

On our website we use cookies to see which pages are most often visited and also to see how the site is performing in terms of speed, browser types (Google Analytics is used), and to remember you when you return to our site.

### **Cookie Settings**

**We use cookies and other tracking technologies on our website. Functionalities may include:**

- Assisting you in navigation;
- Assisting in registration, login, and your ability to provide feedback;
- Analysing your use of our products, services or applications;
- Assisting with our promotional and marketing efforts.

**Below is a list of the cookies we use on our website. We scan our website with our cookie scanning tool regularly to maintain a list as accurate as possible. We classify cookies in four categories:**

- Strictly Necessary Cookies
- Media Cookies
- Performance Cookies
- Advertising Cookies

#### **Strictly Necessary Cookies**

These cookies are necessary for the website to function and cannot be switched off in our systems. They are usually only set in response to actions made by you which amount to a request for services, such as setting your privacy preferences, logging in or filling in forms.

You can set your browser to block or alert you about these cookies but some parts of the site will not work without them.

#### **Media Cookies**

These cookies enable the website to provide enhanced functionality and personalisation. They may be set by us or by third-party providers whose services we have added to our pages.

#### **Performance Cookies**

These cookies allow us to count visits and traffic sources so we can measure and improve the performance of our site. They help us to know which pages are the most and least popular and see how visitors move around the site.

All information these cookies collect is aggregated and therefore anonymous. If you do not allow these cookies we will not know when you have visited our site and will not be able to monitor its performance.

#### **Advertising Cookies**

By adding tags to a page, we can track a user or their device across different websites. That helps build a profile of our visitor based on browser habits, so messages can be better targeted to your interests.
